Publications of this body printed in America before 1801 are available in this library in the Readex Microprint edition of Early American Imprints published by the American Antiquarian Society.

This collection is arranged according to the numbers in Charles Evans' American Bibliography.

1. The first part of the paper is devoted to a general discussion of the problem of the existence of solutions of the system of equations (1) for arbitrary values of the parameters  $\alpha$  and  $\beta$ . It is shown that the system has solutions for all values of the parameters  $\alpha$  and  $\beta$  if the function  $f(x)$  is continuous and has a bounded derivative. The second part of the paper is devoted to a detailed analysis of the case when the function  $f(x)$  is a step function. It is shown that in this case the system has solutions for all values of the parameters  $\alpha$  and  $\beta$  if the function  $f(x)$  is continuous and has a bounded derivative. The third part of the paper is devoted to a detailed analysis of the case when the function  $f(x)$  is a step function. It is shown that in this case the system has solutions for all values of the parameters  $\alpha$  and  $\beta$  if the function  $f(x)$  is continuous and has a bounded derivative.
